

BOWKER'S

Best Reference Books:

ARRANGED BY LC CLASSIFICATION NUMBER

This first edition of **Bowker's Best Reference Books: Arranged by LC Class** offers more than 20,000 hand selected reference titles appropriate for your academic library. Use this resource to aid in collection development and acquisition. Confidently rely on the vetted selections of more than 150 subject specialists and esteemed professionals from academic institutions around the US.

Reference sources in every subject were considered during selection, originally compiled from subject bibliographies, professional journals and the reference departments of major university libraries. Subject specialists, experts in their field, made the final determination as to which books to include in this resource. Strict criterion was used during selection and results were compiled to represent a "best reference book" for each subject area within the LC Classification schedule.

Each entry is given an academic rating - labelled appropriate for either college, university or research libraries. Additionally, all entries contain author, title, title description, publisher, location, publication date, ISBN, Dewey Decimal Number, LC Classification Number, LCCN, and ISSN when applicable.
