

Resources for College Libraries

In November 2006, **Resources for College Libraries** was released in a print edition spanning 7-volumes and covering more than 62,000 recommended titles.

Brought to you by Bowker and ACRL's *Choice*, **Resources for College Libraries** is a direct successor to 1988's *Books for College Libraries (BCL3)*.

The seven-volume set is organised into 58 curriculum-specific subjects under the following categories:

- » Humanities
- » Languages and Literature
- » History
- » Social Sciences and Professional Studies
- » Science and Technology
- » Interdisciplinary and Area Studies

The seventh volume provides a helpful cross-referencing index, which explains the relationship between the RCL subject taxonomy and LC ranges.

New to this edition are the inclusion of interdisciplinary subject areas and the selection of electronic resources and websites essential for undergraduate library collections. Non-book selections are easily identified by a graphic indicator included in the item record. All selections are assigned an audience level marker indicating whether the title is most appropriate for lower-division undergraduate, upper-division undergraduate, faculty or general readership. Records also include a notation if they previously appeared in *(BCL3)* or have been reviewed by *Choice*.

Volumes can be purchased separately or as a set.

For an even better value, enrol in a standing order and save 10% on this edition and 5% on all future editions, which will be sent to you automatically. You may cancel a standing order at any time.

Resources for College Libraries data is also available online through RCLweb.
